Mesh container for Euro pallets

We have our standard products, but also we manufacture it according to your drawing

Since our container is meant for standard Euro pallets, it has standard length (1200 mm) and width (800 mm). The height can be different, up to 1 800 mm, according to customer's demand.

Containers can be stackable up to 4 times. The loading capacity is 750 kg - for lower containers and 500 kg for upper one, in this case.
